

 The first step is to open the **DISH Order app** on your terminal.

Now enter your **restaurant ID**. Note: You can find it in your admin panel. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

And afterwards your **security token**. Note: You can find it in your admin panel. It is the API key. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

Once you entered your information click on **submit** to log in.

Have you deleted the App Data? Contact your System Administrator for further notice.

Alternatively click on the link to scan a QR code to log in. Note: the camera at the back of the order terminal will open und you scan your QR code. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

The screenshot shows the DISH Order app interface on a mobile device. The status bar at the top indicates 3G connectivity, 67% battery, and the time 16:07. The app title "DISH ORDER" is displayed in white on an orange background. Below the title are two input fields: "Restaurant ID" and "Security Token". A white "SUBMIT" button is positioned to the right of the "Security Token" field. A yellow rectangular box highlights a link that reads "Use QR Code to pair device with Restaurant Website". At the bottom of the screen, there is a message: "Have you deleted the App Data? Contact your System Administrator for further notice." The Android navigation bar is visible at the very bottom.
